-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

An "is" seems to be needed at line 4, before "contained".

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims1,2 are rejected under 35 U.S.C. 102(b) as being anticipated by ROELOFS et al '75.

See page 582-100% trans acetate and alcohol were mixed at 90:10, thus meeting claim 1. Attractancy iof males was demonstrated; thus, no mating could occur.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by BECKER et al 5002971.

See column 2-the acetate to alcohol encompasses the instant 90:10 or more, and the ratios of E/Z also are encompassed. Mating disruption from container placement in the fields is shown (column 2, lines 12-34) at >300 dispensers/ha (lines 36-41).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over ROELOFS et al '75 in view of RAMA et al WO 01/26462

The ROELOFS pheromones were effective, but claim 3 was not evident. RAMA shows this method for any pheromones (page 7), thus obvious to use to control twig borers by using twig borer pheromone mix of ROELOF placed at over 300 points/hectare in the RAMA dispensers. Motivation to combine the twig borer pheromones, with a dispenser, is the availability of pheromone dispensers as means to apply an effective, controlling amount of pheromone, in order to utilize the specific pheromones to control a specific pest of interest, twig borer.
